*** Sensor Mini -Luminaire with a built-in sensor**

Whenever the DIP-switch, controlling the mode, is switched to "Disable" the light will not be turned on and off automatically. Instead the light must be switched on and off manually on an external switch. A Tex switch on the wall.

The sensor has a reach of two meters and triggers the luminaire when motion is detected within its reach.

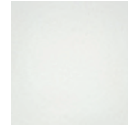

The luminaire is switched off automatically if there is no motion within its reach for three minutes.

RONDO

Dimmable lamp in glossy opal glass with LED. Transformer and light source is included, energy class A+. Certified for bathrooms. Is available with IP44, see description below.

SINNE

DESIGN: JOAKIM FIHN

With basic thought in its classic elliptical shape, Sinne sits close to the wall and gives the impression of a more slim appearance. To give Sinne more personality, we have chosen to break up the elliptical shape with a certain angularity. The luminaire also has beveled ends which allow the fine inside to be visible. The inside is hand painted in a contrasting color to create depth, a more open inviting shape and pleasing light effect. The color range chosen is of an earthy and nature-like character to connect with nature. Sinne gives a decorative directed up and down light with at the scattering angle. The series is designed for halls, corridors and stairs and other spaces where a compact luminaire is desired.

OUTDOOR LIGHTING

OUTDOOR LIGHTING – DURABLE, FUNCTIONAL, CLASSIC

The selection of Belids outdoor lighting is developed to stand the rough climate of the Nordic outdoor environment and weather conditions. Except for durability, we have focused on developing an innovative and functional lighting suitable for different use. Depending on how you would like to illuminate your outdoor environment, we offer various models and styles to create the right sensation and function. Choose between classic- and traditional models or more modern and minimalistic options.

Contact authorised electrician for fixed installations.

BEND

DESIGN: POUL TREINER

Bend is a new outdoor family of wall- and bollard lighting, designed by Paul Treiner. With a modern and discreet expression, Bend gives the sense of opening up and letting the light out down on its surroundings. Choose from a white structure, anthracite and Galvanizedanisation. To secure many years of good outdoor lighting, an IP65-load module of the highest quality has been developed together with a Swedish supplier, which gives optimal protection against rain, cold and hits.

GEKKO

DESIGN: POUL TREINER

Gekko is a unique wall lamp, with a clear cup of glass, designed by Paul Treiner. The light flows from above and below, and also from the sides which gives a unique divided but pleasant light around the wall. To obtain the original light energy saving LED-light source is recommended. Choose from graphite-, white-, black structure and galvanisation.

LOOP

LOOP is a classic ceiling fixture in a galvanised sheet of steel and acrylic cup that includes integrated LED-light source. The lamp comes in two different models, one for outdoor use and one for indoor use. Loop represents a functional design and secures a soft, and pleasant light that doesn't annoy the eye.

TAURUS

DESIGN: JOAKIM FIHN

Taurus, a modern and minimalistic outdoor family, designed by Joakim Fihn. To secure many years of good outdoor lighting, an IP65-load module of the highest quality has been developed together with a Swedish supplier, which gives optimal protection against rain, cold and hits. Taurus comes with a new finish, galvanisation, rusty structure and anthracite.
